

The Strongest Version, a Must in Power Games!

Super-thick Carbon Wire to Support Big Bass

Pile Driver "Heavy" is exactly the thing to get big bass. The ultra-thick carbon wire will never be defeated in the tough fight against big bass. Works beautifully with a thick, strong line. With the cork screw worm keeper tightly holding the worm, you can concentrate on fishing without having to worry about the worm slipping away.

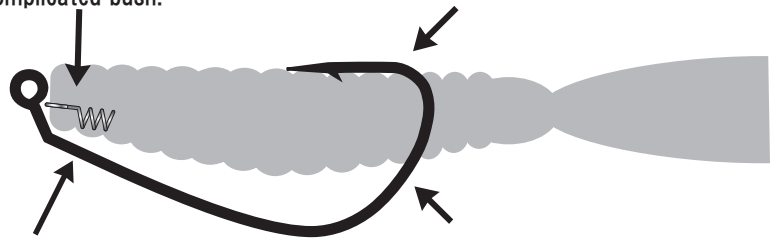

■ Merit of the very thick carbon

- It is congenial to a fluorocarbon line or PE line
- It is made early the fall speed in weight less.
- The Power not to lose the fight of huge bass
- It is easy to take the balance of a high specific gravity worm.

■ A corkscrew worm keeper

The adoption of the corkscrew worm keeper. A worm does not slips off and does not come off even if you cast it into a complicated bush.

■ Strong wire.

It does not transform even the strong fight of the big bass.

■ Wide Gap form

It is congenial to the worm of the large bulky body. The design which is usable with the worm of what kind of size.

■ Cover contact keel

A keel part of the hook is in front than a head part of the worm. It prevents slipping a worm off from clashing an obstacles.
