

## The All-Round Rubber Jig for Bottom, Cover, Mid-Layer, and Head Action Enticement .

The Baw Head Jig is an all-round rubber jig created based on the "Baw Head," a jointed jig head with a proven track record. Because the rubber-tied head and the hook are connected by a split ring, when shaken, only the head and rubber skirt sway, while the trailer maintains its natural action. This achieves a "bite-inducing" action that appeals effectively while suppressing unnatural movements. It performs with particularly high effectiveness not only for bottom bumping and shaking, but also for "Jig Stroking," a mid-layer method that has gained attention in recent years for its fishing success. Since it uses an offset hook, it can be used to conquer cover and bushes without snagging. It's a wide-ranging rubber jig that's good for pitching, good for retrieving, and good for shaking, depending on the situation. It features a football head that prioritizes stability on the bottom and water displacement during head action. Excellent cover-avoidance capabilities are achieved through the eye guard and eye position, which reduce entanglement with trash and weeds.

### HEAD DESIGN

It features a football head that prioritizes stability on the bottom and water displacement during head action. Excellent cover-avoidance capabilities are achieved through the eye guard and eye position, which reduce entanglement with trash and weeds.

### HOOK

RYUGI' s rich experience gave birth to the ultimate standard offset hook, INFINI (TC) 3/0.

### JOINT

The jointed structure, which separates the head and hook, allows for an intense head-and-rubber-only action. This minimizes travel distance while appealing strongly to invite bites. Since it's connected with a split ring, it's also possible to change hooks to suit the size and shape of your trailer.
