

## Sensitivity, Action, Shape – Everything is brushed up in this Tungsten Model!

Stability at the bottom, sensitivity, easy operation that reduces tangling with seaweed, and free actions enabled by the joint head – Bow Head has gained many fans, backed by its performance. Now it welcomes a high-density tungsten version. The tungsten tweaks up the sensitivity. The compact head works naturally with a slender worm, gives sharper actions, and improves the snag-less quality. Perfect for striking the bottom, from cover attack to the latest popular mid-strolling with a rubber jig, Bow Head has evolved into a joint jig head that can handle a variety of methods powerfully.

The joint limits the moving distance, enabling sticky actions!

Our passion designed this shape, high-density tungsten head.

RYUGI's rich experience gave birth to the ultimate standard offset hook, INFINI (TC) 3/0.

**SIZE** \* The hook size is 3/0 for all weights

1/8oz 3/16oz 1/4oz 3/8oz 1/2oz

By contacting the bottom at a point, Bow Head's thick football shape provides sensitivity as well as stability. The line eye guard reduces the pesky trash tangling. The weight is engraved. The feedbacks from the field is merged into this design.

The joint head has freed up the worm's actions. Split ring is attached to make hook-change super easy.

Weight	Hook Size	/a Pack	Price (Tax-excluded)
1/8oz	3/0	2	800 yen
3/16oz	3/0	2	850 yen
1/4oz	3/0	2	950 yen
3/8oz	3/0	2	1,200 yen
1/2oz	3/0	2	1,300 yen
