

CHAIN CUSHION

**Great protection for a knot.
Tear apart the cushiony rubber ball for easy use.**

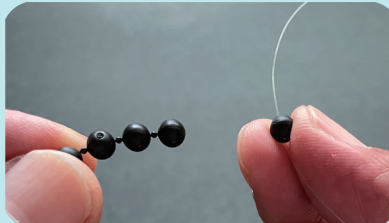

Recently, drift weight is becoming popular as in free rig, Texas rig, or Carolina rig. ZAPPU' s CHAIN CUSHION is a soft part that reduces damage on a knot by a free-moving sinker. Many anglers had occasions to drop this small ball during a set-up and could not find it. To find the dropped part easily, 5 pieces of cushion are connected together. After threading the line, you can tear a cushion apart. You can also use it to secure a trailer hook or a worm on a worm hook. It' s super convenient.

A friendly design that helps you find the lost cushions. Easy to thread!

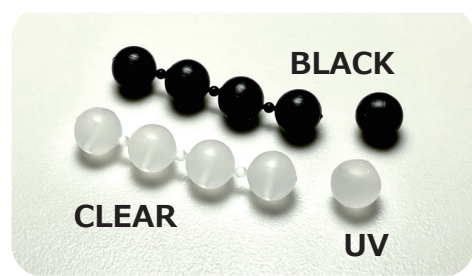

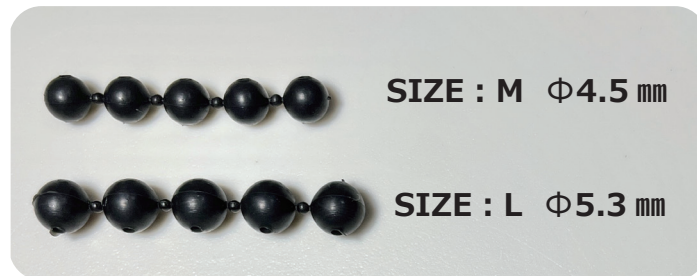

Thread one of the connected Chain Cushion balls.

Tear apart the ball that is threaded.

Complete the rig.

Size	Color	/a pack	Price (Tax Excluded)
M (4.5 mm)	BLACK CLEAR UV	30	330 yen
L (5.3 mm)	BLACK CLEAR UV	30	330 yen
