

A high-specific-gravity stick bait that appeals with a strong wave wacky action.

Limbo!! is a stick bait that can be used regardless of field or rig. The deeply carved ribs create a strong wave by firmly grabbing water while ensuring presence with a slightly thicker silhouette.

The material used is "SAF material," which has a high track record and is supported by many anglers.

A perfect blend of salt (high specific gravity), amino acids (attractant effect), and formula (taste and smell) achieves excellent castability, strong wave action, and extended bite time.

The synergistic effect of design and material packs all the elements of a fish-catching stick bait into a simple form.

Not only rigs using offset hooks such as no-sinker, Texas, and free rigs, but especially inch wacky, no-sinker wacky, and neko rigs appeal by wriggling powerfully. Limbo!!'s recommended usage is to induce a predatory strike.

NEW!

3inch About 4.2g

4inch About 5.7g

■ SAF Material

Uses "SAF material" which is a blend of salt, amino acids, taste, and smell components. High specific gravity achieves excellent castability and extended bite time.

■ Body Design

Thorough pursuit of body thickness and length to create strong waves. The edgy, deep ribs not only firmly grab water and exert presence but also serve as a source for hook holdability and delicate action while maintaining a thicker silhouette.
