

**MAGNUM BREDY**

## Magnum Blade – The Strongest Vibration in the Bredy Series

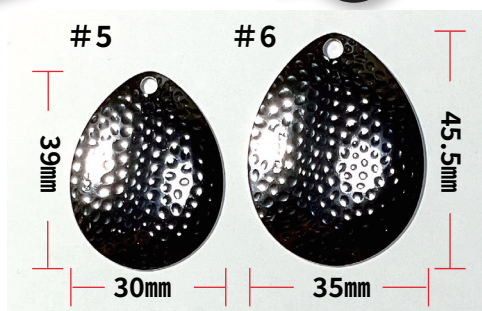

For years, a handful of core anglers have secretly relied on a unique topwater modification: tuning lures with an oversized Colorado blade. This classic “big Colorado tune” generates powerful vibration and intense flashing even at an extremely slow retrieve, while adding a subtle body wobble driven by blade power. The result is exceptional fish-attracting performance. The Magnum Bredy brings this proven topwater technique into the subsurface world by combining it with soft baits. It pairs especially well with flat, bluegill-style worms, producing a twisting, rolling action that has delivered outstanding catch results. With a size that was previously unimaginable for a Colorado blade, the Magnum Blade achieves a level of lure appeal that soft baits alone could never produce.

このブレード、  
暴力的

- ① The ring and swivel are secured with a tube to minimize tangling and ensure stable performance.
- ② The massive blade produces strong flashing and a rolling action even on the slowest retrieves.

### ■ Swivel Fixing Tube

The wide blade profile and optimized rotation angle reduce unnecessary contact with the worm, maintaining stable vibration and consistent swimming action.
