

P.D.CHOPPER Jr.

SPACE
METAL™

(一部)

Cope with tough conditions with Bottom Bumping and Leaving It Alone. The ideal jig equipped with the fine rubber/silicon time-lag skirt and the short-shank hook.

While keeping the characteristics of the original size, this Chopper comes with a short-shank hook as well as a time-lag skirt made of fine rubber and silicon equally mixed. With the added potentials, it will help you conquer even cunning bass in tough conditions.

■ The Short-shank Hook and the New Head Adjusted into a Smaller Size

As the hook was reduced to a short-shank type, the head was also renewed. It creates more waving motion during extra-long stay, allowing suspicious bass to let the guard down. It is excellent at slipping through obstacles.

■ Double Specifications with Cork Screw Worm Keeper & Wire Keeper

Equipped both with the cork screw worm keeper and the regular wire worm keeper. If you prefer a regular setting, remove the cork screw worm keeper.

■ Strong Short-shank Hook with exceptional Hooking power
The hook with the short shank balances well and it is compact.

■ a time-lag skirt made of fine rubber and silicon equally mixed.

CORK SCREW WORM KEEPER &
WIRE KEEPER specification

Hooking power preeminence.
Short shank hook with the strength.

The semi-flat head
which can dodge weeds
exquisitely.

a time-lag skirt
made of fine rubber
and silicon.

Setting ① [PD Setting]

Setting ② [通常 Setting]

The corkscrew worm keeper
deployment. It passes through a super
heavy cover without a difficulty.

Setting of the hooking serious
consideration. A wire worm keeper fixes a
trailer solidly.
