

Fast fall. Sticks to the bottom. A pinpoint-attacking sinker.

The streamlined pyramid is our original form, that achieves the high-speed fall and the staying capacity without rolling around at the bottom. The form allows Pinfree shot to stick to a pin-point location for a free rig, direct rig and drop shot rig. Also, the pure tungsten material with the mat finish reduces unnatural reflections, so the rig looks less awkward.

The tear-drop form cuts water resistance and speeds up the fall. The edged pyramid shape slashes rolling around at the bottom, letting it stay put on a pin point for a long time.

Although it's pure tungsten, it doesn't glitter. The mat finish weakens inappropriate reflections and lessens the rig's strangeness increasing a natural look. The broad line-up accommodates to various situations. The engraved weight description is quite handy.
