

Nekorugu Hook with Super Fine Wire! Specialized for Light Tackle.

Rigid Wacky is a Nekorugu hook for 2.5 – 5lb line, especially designed for ultra-light – light tackle.

The long, flat bend, the sharp bend that enables V-stabbing – Zappu' s knowhow on hook shape works exceptionally well with a slender worm and this slender hook. Rigid Wacky holds a worm well from tearing and prevents the hook from rolling around, responding impressively to a delicate handling with a light tackle.

Specialized For Light Tackles

Works with lines : 2.5 ~ 5lb

SIZE

Long Flat Shank

The long bend designed with less curve will hold a worm tight when stabbing it vertically for Nekorugu, preventing the tear and slide during actions and reducing the slip off while casting.

V-zashi Narrow Throat

The sharp-angle throat allows V-zashi (the hook stabs the worm in a V shape), securing the worm in place, grasping the water, and transferring your maneuver into ideal actions.

It also prevents the worm from flipping over the hook point, thus, reducing a hooking miss dramatically.
