

## Supreme Finesse Hook for Competitions, Light, Thin and Lets Worms Move

Air Dancer is the hook for light rig, born out of Inch Wacky. We used fine wire to make it super light. It harnesses the worm action, and it is easy for fish to suck in; perfect for stand-alone fishing. Of course, the hook's sharp-angle throat makes V-piercing possible. Whether in small-mouth bass fishing with tiny worms or in tournaments where you need a breakthrough in tough conditions, this hook shows its brilliance. Nice in ocean fishing, too.

# Air Dancer

■ Super Fine Wire for Finesse Worms  
Made of super-light fine wire. You can harness worm's own actions to invite fish more naturally.

■ Secures Worms in Place! The Narrow Throat for V-Piercing

The sharp-angle throat makes V-piercing setting possible for your Inch Wacky. The worm will firmly catch water, which produces ideal actions. It also prevents hooking miss due to the worm covering the hook point.

■ Long Flat Shank, perfect for Neko Rig  
The shank is designed flat and long, so you can pierce the worm deeply for your Neko rig. It prevents slipping of the worm, making it hard to lose the worm during casting.
