

Memory Mono Guard Delivers the Ideal Firmness

The newest inch-wacky for attacking covers, Inch-Wacky i Guard.

The highlight of this Mono Guard is the order-made, the world's first "Memory Fine Wire".

With a fine combination of strength and flexibility, it securely hides the tip of hook in cover and quickly exposes it during a bite for successful hooking. Exceptional durability makes it hard to bend.

Try it on tough cover and weeds to experience Inch Wacky's power!
