

The Flat Head Shapes the Excellent Posture at the Bottom

Equipped with the memory wire guard, it slides through cover with no sweat!

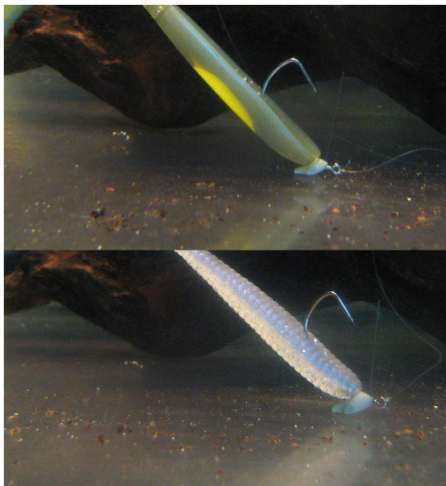

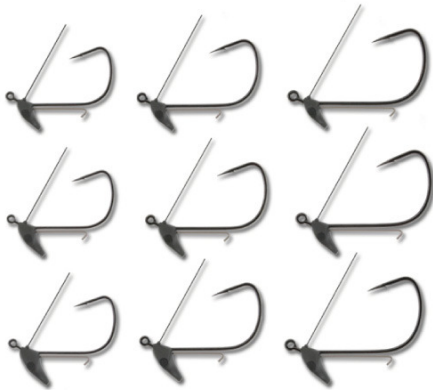

It will take all techniques, such as natural stay, jumping and swimming, to higher levels.

Mustang Head is a jig head produced by an expert guide working at Biwa Lake. Its flat head makes an extra-long stay possible without any line tension. We tweaked the position of the eyelet to bring out lively jumping motions and graceful swimming posture during mid strolling. It does not choose ranges or fishing methods. This product loaded with memory fine guard can be used in various settings from open water to cover.

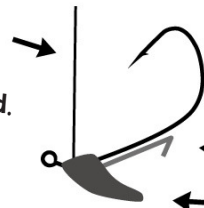

■ 3 Hook sizes and 3 weight sizes allow you to use a wide range of worms from finesse to regular. 0.1oz and 0.12oz are now available.

■ Just the right duration of shape-memory: the fine wire Mono Guard will let you escape cover, yet, hooking fish is outstanding!

Mustang Head
[マスタングヘッド]

This product loaded with memory fine guard.
