

Speedy and Authentic: a Realistic Head Racing through Water

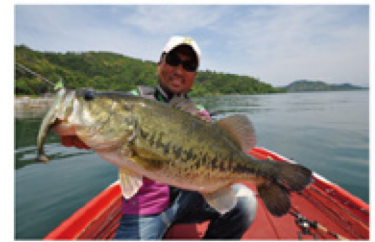

The key is the speed and a real look. Slowly pull genuine-looking baits, such as Clone Ayu or Shad Tail Worm, in deep water. Or quickly pull them in shallow ranges. By changing speeds, you can attract fish into biting.

- swimming... low – High speed, Balance stable by all depth of the water.
- staying on the bottom...Landing on the bottom at three fulcrums. Direction vulnerable fish.

The cut method which unifies a trailer with a head

Cut a worm here and put it on.
