

The Low-pitch Rattle; the Big-bass Hunters' Favorite The Long-awaited Rattle Made of the Bone!

We used the Bone (heat-resistant plastic) for this rattle case.
Different from regular plastic or glass cases, it makes lower rattling sound.
The Rattler received good reviews that it works for big bass that are used to the common high-pitch.

You can use it to add more appeal to your Inch Wacky, insert into no-sinker worms, set it on a rubber jig with a rubber band or try it with any other idea.
