

Sinkers Not Allowed to Slip!

The Ultimate Stopper in the Tungsten Era!

The new-generation sinker stopper was developed to secure tungsten bullet sinkers in place. We carefully chose pure rubber for this product. Compared to regular painted stoppers, the holding ability is hands-down. It works fantastically with Fluoro line. While shooting at cover or doing Texas on rocks, you don't need to worry about a sliding sinker any more, but can concentrate on attacking and on bites. Slipping sinkers are not allowed any more!

- 1 First, let the line go through the ring of wire sticking out of the stopper.
- 2 Drag one of the stoppers from the wire to the line. Holding the stopper with fingers, pull the wire backward to let the line go through the stopper's hole.
- 3 With a long-enough line pulled out of the stopper hole, put the sinker on the line, then, tie a hook. Push down the sinker close to the hook and push down the stopper against the sinker to secure it.

Type	A WEIGHT ADJUSTABLE	/a pack	Price (Tax-excluded)
S	1/32 ~ 3/16oz	12	350 yen
M	1/8 ~ 3/8oz	12	350 yen
L	1/4 ~ 1.5oz	12	350 yen

F version

Type	A WEIGHT ADJUSTABLE	/a pack	Price (Tax-excluded)
S	1/32 ~ 3/16oz	18	500 yen
