

Into the Deep End of Cover!

Toughest Small Rubber Jig for Bait Finesse!

- Guard – For a tight approach to lay-downs and brush piles, hardy 8-piece guard is used.
- Head – The design focuses on the ability to slip through into the deepest end of cover.
- Hook – Scaled up compared to other jigs in the same class. Its ability is brought out in power games with bait finesse tackle. Comes with the Zappu original hook made by C’ultima.
- Skirt: We loaded it with double skirts in different thicknesses in search of the ultimate pulsating motion. Color, durability and flare are maximized in the skirt made of silicon.
